Upgrades

Memory Upgrades

Adding 4 Mbytes of RAM to your Phaser 340, for a total of 12 Mbytes, increases its performance. More RAM enlarges the printer's virtual memory, allowing the printer's PostScript processor to perform better. The 16-Mbyte RAM SIMM upgrades you to the Phaser 340 Plus.

16-Mbyte RAM SIMM 4685F16

Phaser 340 Plus Upgrade

Upgrading your Phaser 340 to the "Plus" configuration gives you 600 x 300 dots-per-inch resolution. In addition, your printer can job pipeline, that is, print one image while offloading another from your computer for greater throughput, less waiting, and more productivity. As an added bonus, the "Plus" printer has 69 built-in fonts and can store more downloadable fonts. The Phaser 340 Plus is ideal for fast-paced business workgroups.

(also requires ordering 46585F16 RAM Upgrade Kit)

PhaserShare™ Network Cards

The Phaser 340 uses a unique slide-in card to give the printer new networking capabilities. Installation is simple and just takes minutes, with no special tools required.
